

# INTEGRATING STEM AT HOME

To help foster learning, encourage your child to ask questions about the world around them so that they may take an active role in their own learning. By asking questions they are developing their critical thinking skills. Instead of providing an answer, respond with alternative questions and ideas to incite them to search for answers and solutions themselves.

Encourage curiosity and questions through play. There are many activities that you can adapt at home or when you are out to not only encourage their learning but to also make learning an enjoyable experience for everyone.

## SENSORY DEVELOPMENT

Invite children to use their five senses to describe what they see and observe.

- How does it feel?
  - What does it look like?
  - What does it smell like?
  - What do you hear?
  - How does it taste?
-
